

The Biofore Company **UPM**

## The RFID product range from UPM Raflatac HF & NFC tags and inlays

### Typical end-use areas:

- Media Management
- Pharma, Healthcare and Life Sciences
- Item Authentication
- Industrial
- Ticketing

UPM Raflatac presents its HF & NFC product line of RFID tags and inlays designed for the global market. With a wide selection of antenna choices and protocols, UPM Raflatac HF & NFC tags and inlays offer great application flexibility and fit-for-function design in the most demanding applications.

HF & NFC 13.56 MHz ISO-compliant RFID technology is a proven, globally accepted solution for a vast array of markets. The technology is a perfect fit for item-level authentication and asset tracking solutions in healthcare, pharmaceutical and medical applications. Popular industry applications consist of library and rental item-level tagging for automated self checkout and return of printed and digital media, industrial closed loop systems for manufacturing automation, and utilisation of RFID as personal currency in ticketing and customer loyalty card applications.

HF & NFC RFID technology offers proven robust performance with short-to-medium read ranges even when used around difficult materials such as liquids and metals.
